

## COLORADO FIELD ORNITHOLOGISTS - SIGHT RECORD FORM

23-93-44

NEW STATE RECORD ☐UNUSUAL RECORD ☒

ACCEPTED

Please print or type. Attach photographs and additional pages if necessary.

Species: Laughing Gull (~~1st winter~~) / Larus Atricilla  
(Vernacular Name) (Scientific Name)Date(s): Dec. 13, ~~1991~~ & 14<sup>th</sup>, 1993Number of birds seen: One (1) Sex:      Plumage: First WinterLatilong:     ? Distribution Code:     ? Habitat Code:     ?Locality: Cherry Creek Res. Elevation: 5350 FeetNearest town: Denver Countv: Denver - ArapahoTime(s) observed: 1:00 PM to 2:00 PM on 12-13; 8 AM-12 N 12-14,Duration of observation (e.g. 1 sec., 5 min., etc.): 1 hour and 4 hrs, resOther observers who saw the bird with you (give names, addresses, telephone numbers): Alice on 13<sup>th</sup>, Joe Roller - late on 13<sup>th</sup>, Sherri Chapman, Marlene Eggertling, Joe Himmel, Karleen Schofield on 12-14 (most CFO members) Duane Nelson

Other observers who saw the bird independently (give names, addresses, telephone numbers):

Dr. Joe Roller - 12-13, Karleen Schofield - 12-14, Joe Himmel - many other  
on 12-14

Light conditions (position of bird to light and shade, direction and strength of light):

Sunlight from SO. Gull mostly west from me -Optical equipment used (e.g. power, types): Swift 8.5x Bushnell Scope  
Zoomed to 36xDistance and how measured: Bird flew within 50 yards of me. 20 yds. 12-14-93If photographed, type of equipment and film: Minolta X700 - 300 MM Lens  
Film - ~~35~~ Ektachrome 400Who else photographed the bird: Duane NelsonDescribe the bird's behavior (e.g. flying, feeding, or habits used in identifying): Gull flew incessantly. Alighting on water after about 1 hr. to allow telescopic view & verify bill size and shape. on Dec. 14, allowed much closer approach than Ring-bills.Describe in detail the bird's relative size, overall shape, plumage and color pattern. Include details of bill, wing and tail shape. Give particular emphasis to marks you used to identify the bird. Reference to its resemblance to field guide descriptions and illustrations is not enough. Describe only what you actually observed in the field: Small size and darkness first attracted. Much wider tail band than other small gulls I've seen. Black legs and bill. Upper tail whitest part of bird. Dark brown primaries, Mantle brown mottled w/ grey. Dark. 12-14 observation of standing bird: Slight-broken eye-ring

Description (continued): narrow smudge behind eye. Large bill  
curved downward at tip - proportionally larger than Franklin's  
or Bonaparte's. ~~E~~ Apparent eye-ring - split

Describe the bird's song and call, if given, including method of delivery,  
(i.e. from perch, in flight, duration):

Not heard

Describe the general and specific habitat in which you observed the bird:

Reservoir near dam - and shore

How did you eliminate similarly appearing species?

The size - compared to many ring-bills present. Size of  
tail-band and bill eliminated other small gulls.

What is your prior experience with this and similarly appearing species?  
Many Laughing Gulls on visit to Ocean City, Md. two years ago

Many Franklin's each year in Colorado

List books, illustration, recordings, other birders, etc. consulted and how  
this influenced your identification:

a) At time of observation:

Natl Geographic Field Guide

Advance Birding - Rautman

b) After observation:

Audubon (Master Guides)

Enc NA Birds - Terres
